**1. Early 19th Century Paper Cutting Machine  
Inventor Engraved Card. \$65**

"Cowper, Machinist. High Street, Newington, Patentee of the Improved Paper Cutting Machine". And a terrifyingly effective-looking machine it is. 3"x4.25". Some soil and light foxing, minor wear. Removed from an album with glue points on the back.

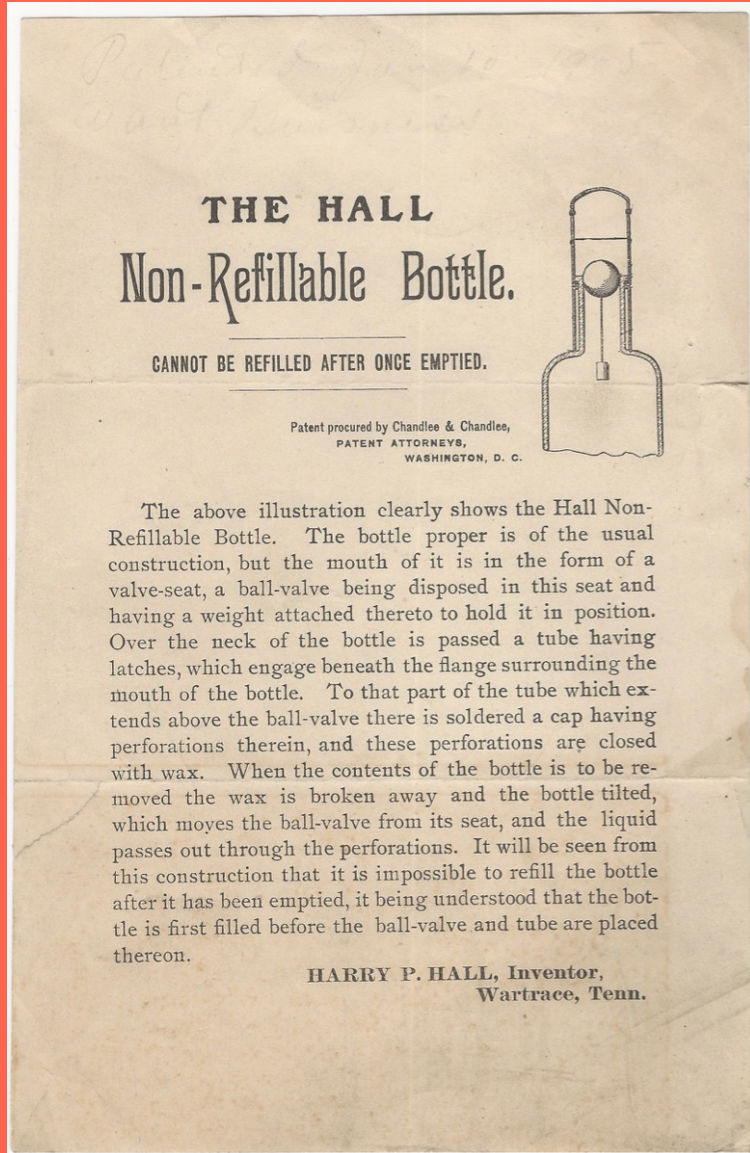

**2. 1860s-70s Boston Plumber Business Card. \$20**

"Plumbing Work and Materials of the Best Description at the lowest prices, by William Mills, No. 26 Devonshire Street, Boston". Printed on clay-coated stock popular in the 1860s and early 1870s. 4"x2.5". Minor soil, light wear.

### 3. [Hall Bottle] 19th Century Hall Non-Refillable Glass Bottle Illustrated Tennessee Handbill. \$50

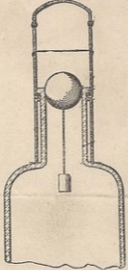

An ingenious design, meant to protect manufacturers from having their products adulterated or outright faked by vendors seeking to make a larger profit. Invented and sold by Harry P. Hall, inventor, of Wartrace, Tennessee. Single sheet. 5.5"x8.5". Folds, some soil and light wear. Starting to separate along the folds. Delicate.

**THE HALL**  
**Non-Refillable Bottle.**

CANNOT BE REFILLED AFTER ONCE EMPTIED.

Patent procured by Chandler & Chandler,  
PATENT ATTORNEYS,  
WASHINGTON, D. C.

The above illustration clearly shows the Hall Non-Refillable Bottle. The bottle proper is of the usual construction, but the mouth of it is in the form of a valve-seat, a ball-valve being disposed in this seat and having a weight attached thereto to hold it in position. Over the neck of the bottle is passed a tube having latches, which engage beneath the flange surrounding the mouth of the bottle. To that part of the tube which extends above the ball-valve there is soldered a cap having perforations therein, and these perforations are closed with wax. When the contents of the bottle is to be removed the wax is broken away and the bottle tilted, which moves the ball-valve from its seat, and the liquid passes out through the perforations. It will be seen from this construction that it is impossible to refill the bottle after it has been emptied, it being understood that the bottle is first filled before the ball-valve and tube are placed thereon.

**HARRY P. HALL, Inventor,**  
Wartrace, Tenn.

1

NON-  
REFILLABLE  
BOTTLE.

JUST AS IT LEAVES THE FACTORY.

### 4. [Kabisch Bottle] 19th Century Kabisch Co. Non-Refillable Glass Bottle Illustrated Brochure. \$125

An ingenious design, meant to protect manufacturers from having their products adulterated or outright faked by vendors seeking to make a larger profit. "This bottle will protect you and your customers. Whoever wants your brand of goods will get them. It saves 50 per cent of your advertising. It increases your sales to at least 100 percent". Folder. 5.5"x8.5". Folds, some soil, minor wear.

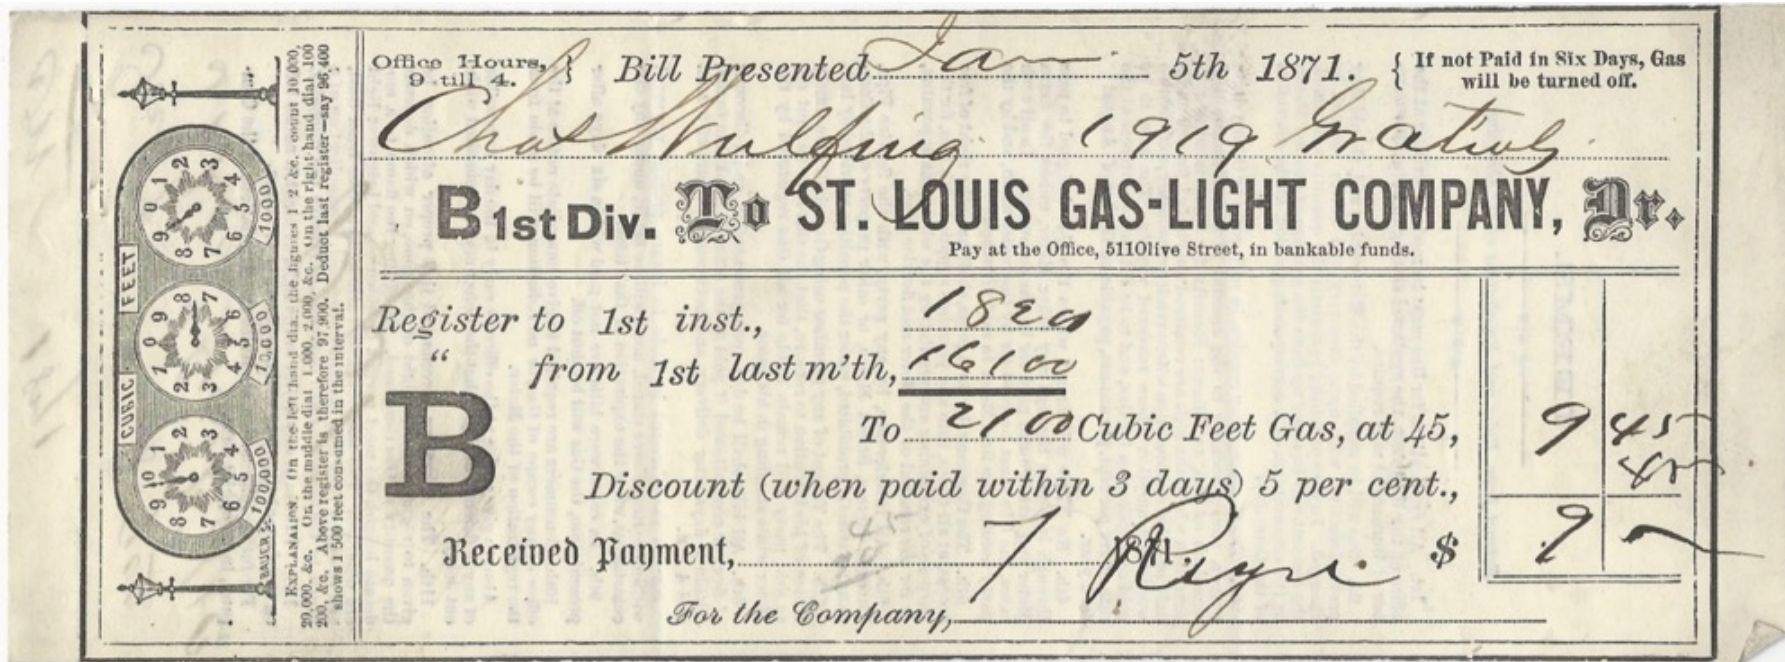

**5. 1870s Cape Cod Christian Camp Ground Carpenter Card. \$40**

A card for Nathan Bennett, "Contractor and Builder, Pleasant Avenue, Christian Camp Ground", under which is written in light pencil, "Nob(?) 158 - Hyannis". The Barnstable Historical Commission explains- "In 1871 The New England Convention of the Christian Church purchased and established a camp meeting known as Camp Christian on the 160 acre Perry Farm in Centreville. In 1872 the Christian Camp Meeting Association was established... Camp Christian was renamed Craigsville in 1881 in honor of the life and ministry of Dr. J. Austin Craig. Situated on a bluff overlooking Nantucket Sound, it served as a spectacular spot for a retreat from everyday life. Families were able to buy or lease the 288 small lots... They initially erected tents or built small shelters, and as time and mean allowed, small cottages were constructed". 2.25"x3.5". Minor soil, 2 pencil notes.

**6. 1871 St. Louis Gas-Light Company Illustrated Payment Receipt. \$20**

An attractive and informative gas-light bill- there's a phrase you don't hear very often. The front of the bill includes an illustration of a gas meter and instructions on how to read it; it also informs us of the small payment window- a 5 percent discount for payment within 3 days, gas turned off if you haven't paid by Day 6. The back of the invoice includes detailed terms of service, obviously written by the great-great-grandfathers of the authors of today's credit card & internet service term contracts. 8"x3". Minor soil, light wear.

**7. 1880s New York Glue Maker Order Form, Business Card & Return Envelope. \$40**

A very attractive 1880s order form self-mailer for the Milligan & Higgins Glue Co., of New York, together with their oversized card for Pulverized Glues and a mailing envelope. 3 pieces- self-mailer order form, 5.5"x9", minor soil, light wear; card, 5.5"x3", light crease, staple holes, minor soil; return envelope- 6"x3.25", stamp torn off, some soil and wear.

ECONOMY.                      CONVENIENCE.                      UNIFORMITY.

We would call the attention of the Trade to our

**PULVERIZED GLUES,**

Which are of unequalled quality and at extremely low figures.

We will forward by mail, free of charge, test sample of any grade or kind of Glue desired.

## 10. 19th C. Cleveland Ohio Bellows Manufacturer Color Handbill. \$35

T.H. Bullock, of Cleveland, Ohio, was a very fine Bellows Manufacturer indeed, having been established in 1865, and proudly blowing hot air ever since. 5.5"x8.5". Folds, some soil and wear, remnant of unrelated ledger page glued to the back.

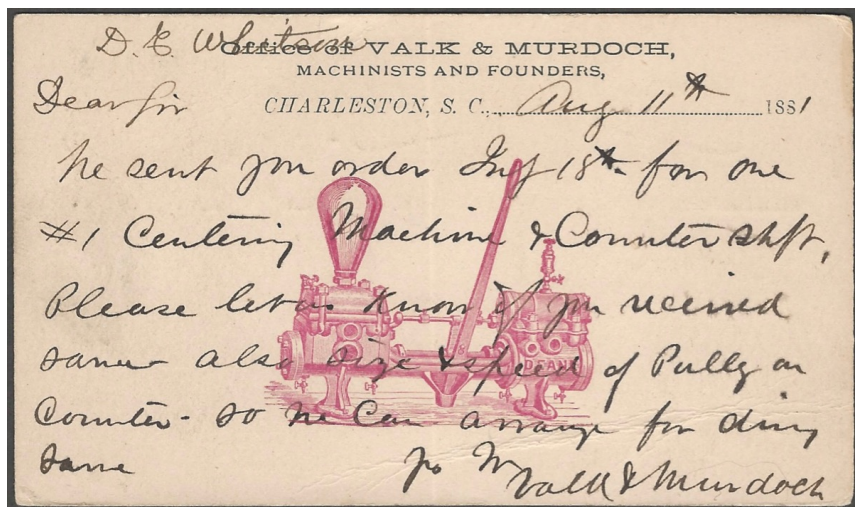

**11. December 1865 American Chair Manufacturers Association Meeting Invitation. \$60**

The meeting took place at Union Hall in South Gardner, Massachusetts, which was one of the leading chair manufacturing centers in the country. Folded sheet. 5"x7.75". Minor soil, light wear.

**12. 1881 Charleston South Carolina Machinist & Founders Illustrated Mailing Card. \$20**

An attractive card for Valk & Murdoch, machinists & founders, with a handwritten message regarding an order. About 5"x3". Some light soil and wear, crease.

South Gardner, Mass., Dec 9 1865

The next Regular Meeting  
of the

**“Chair Manufacturers’ Association,”**

will be held on the last Tuesday in this  
month, at 2 o’clock, P.M., at “Union Hall,”  
in South Gardner, Mass.

The members are particularly requested  
to be punctual.

All Chair Manufacturers not  
members are cordially invited to join the  
Association at this Meeting.

### 13. January 1874 French Hair Advertising Broadside Leon Pelleray & Fils Paris. \$250

A handsome and informative broadside pricing sheet for a Paris hair and wig dealer for the Season starting January, 1874. We had a beautifully illustrated billhead from this firm a few years ago, and the Joseph Downs Collection of Manuscripts and Printed Ephemera at Winterthur holds an illustrated advertisement from the firm dated 1869 which notes that they supplied "hair for men and women, long, frizzed, straight or crimped of first and second quality, priced by weight, partings for ladies called 'cachefolies' (early 19th century name for a lady's wig)". They also sold hairdresser's supplies, including a line of razors.

10.5"x17". Folds, edge chips, and short rips; printed on onionskin paper and very fragile. #51978

14. June 1877 French Hair Advertising Broadside Leon Pelleray & Fils Paris. \$250

A handsome and informative broadside pricing sheet for a Paris hair and wig dealer for the Season starting June 1, 1877. We had a beautifully illustrated billhead from this firm a few years ago, and the Joseph Downs Collection of Manuscripts and Printed Ephemera at Winterthur holds an illustrated advertisement from the firm dated 1869 which notes that they supplied "hair for men and women, long, frizzed, straight or crimped of first and second quality, priced by weight, partings for ladies called 'cachefolies' (early 19th century name for a lady's wig)". They also sold hairdresser's supplies, including a line of razors. 17"x11". Folds, edge chips, and short rips, corner chip; printed on thin paper and very fragile.

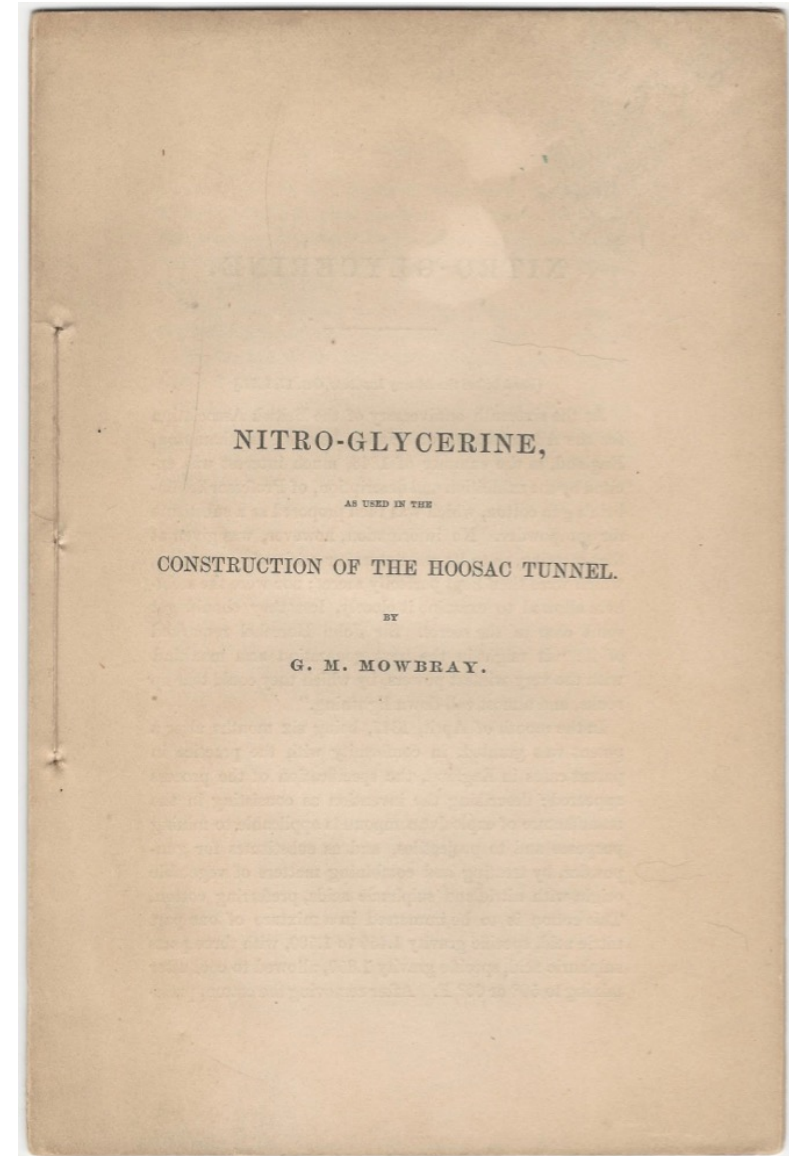

**15. Buckeye Force Water Pumps Fight House Fire Victorian Trade Card. \$25**

5.75"x3.5". Some soil and wear, corner creases, removed from a scrapbook with glue points in the text side.

**16. Nitro-Glycerine, as used in the Construction of the Hoosac Tunnel. \$125**

A paper by G.M. Mowbray, read before the Albany Institute, October 17, 1871. The Hoosac Tunnel, in western Massachusetts, was begun in 1851 and completed in 1875, having exceeded its original budget by a mere factor of 10. When it opened it was the world's second longest tunnel, and remained the longest tunnel in North America until 1916. It was dug using pneumatic drills and explosives, including the first such use of nitroglycerin and electric blasting caps in the United States. Sewn pamphlet. 6"x9", 17 pages. Minor soil, light wear.

— DRAPER'S —  
Self-Recording Thermometer.

SIZE 14" X 20", PRICE \$30.  
" 9" X 14", " 15.

**17. 1891 Draper Self-Recording Thermometer Instrument Trade Card & Note. \$60**

The Draper Manufacturing Company of New York made thermometers, barometers, rain gauges, and other meteorological instruments. The note accompanying this advertising card explains that the companies Board of Trustees has recently voted to make the \$15 machine eligible for a one-third discount to owners of hotels and summer resorts. "it is an invaluable accessory in dwellings, hotels, hospitals, asylums, schools, etc., also in dry kilns, gas works, breweries, glue, varnish and other manufactories".

Card and typed note. Card 3.25"x6", note 5.5"x8.5". Minor wear, light soil.

**18. 1883 Syracuse Marble & Granite Works Steam Polished American Granite Business Card. \$15**

The Syracuse Marble and Granite Works was justly proud of their Steam Polished American Granite, and also made "marble and slate mantels, artistic open fire places, brass enders, andirons, fire sets, etc.". This card apparently was given out at their exhibition at the Onondaga County Fair in 1883. Card. 3.5"x2". Minor soil, light wear, pen note on the back.

**19. 19th Century Metal & Glass King Lemon Squeezers  
Broadside. \$20**

A handsome broadside for the King Lemon-Squeezer, manufactured by the J.P. Smith, Son & Co., of Pittsburgh. Three versions of the squeezer are illustrated, from a cheap, "serviceable" type made of japanned iron & wood, a much better one made from japanned iron, tin-lined, with a glass reamer, and then a model for hotel & restaurant use and is mounted on a wooden base. 9"x12". Folds, some soil, minor wear, small punch hole.

**20. 1890s Yerkes Tile Works, Romulus New York Business  
Card. \$45**

An attractive business card for John M. Yerkes 'Yerkes Tile Works' of romulus, New York, with a photo of the works on the back. Romulus is in Seneca County. 4.25"x3". Minor soil, light wear.

# THE KING LEMON-SQUEEZERS.

**No. 3. (Patent Applied for)**

This article is especially adapted for Hotel, Restaurant and Bar use. It has a perforated heavy-glass bowl, which rests upon a strong gum ring, and a hard wood top well secured to the cast iron cap, so that in use the lemon juice cannot come in contact with the iron. It is mounted on a wooden base and can readily be fastened to a counter or table. The complete article has a steel lemon-cutter attachment, but it will be sold without this cutter at a corresponding reduction in price. Packed one dozen in a case.

**No. 1. (Patent Applied for.)**

This squeezer was made to meet the demand for a cheap though serviceable article. It is made of iron, japanned, and has a perforated hard-wood bowl, with a hard wood plunge, so that the lemon juice cannot come in contact with the iron. It has all the advantages of a wooden squeezer without the defects, besides being much cheaper. Packed two dozen in a wooden box and six dozen in a case.

**No. 2. (Patented April 11, 1882.)**

This article has been improved and strengthened since its introduction last season, and we now consider it decidedly the best in the market. It is finished in japan, relieved with bronze, and has a tin-lined top and a strong detachable glass bowl which seats upon a gum ring. The juice of the lemon is squeezed into this bowl and can be poured out without removing the glass or coming in contact with the iron, or soiling the clothes of the person using it. Packed separately, one dozen frames and one dozen glasses each in a wooden box and three dozen each in a case.

**21. [Music] M.J. Paillard Music Boxes Victorian Folding Diecut Trade Card. \$125**

An exceptionally lovely folding trade card for M.J. Paillard & Co. of New York, "Manufacturers and Importers of Musical Boxes". The lid of the diecut box-shaped card lifts to reveal the inner workings of the box and its "playlist". The lid was lifted once too often and is now detached, much like so many actual 19th century music box lids after a few too many sherries and a round of rambunctious parlor games. Folded card. About 6"x4". Minor soil, light wear. Hinge cleanly split so the card is now in two parts. Removed from an album, with glue points on the blank back.

**22. [Science] Les Inventions Illustrees No.3 - May 1899. \$20**

Published in Paris by Publication Mensuelle. An unfortunately short-lived and uncommon French periodical illustrating a wide variety of inventions, from the ingenious to the unfortunate, with some inventor biographies and related advertisements. The page and plate numbering was carried sequentially from issue to issue. Softcover. About 7.5"x11". 12 pages plus 16 black & white plates of line drawings. Some soil to the covers and a few pages.

**23. [Science] Les Inventions Illustrees No.11 - January 1900. \$20**

Softcover. About 7.5"x11". 16 pages plus 10 black & white plates of line drawings and a double-page color plate. Some soil.

**24. [Science] Les Inventions Illustrees No.16 - June 1900. \$20**

Softcover. About 7.5"x11". 16 pages plus 10 black & white plates of line drawings and a double-page color plate. Light soil.

***That's All, Folks!***
